Declaration concerning the implementation of the directive 2002/95/EG (RoHS) dated 27.01.2003

Dear Mr. Bisson,

the current environmental legislation restricts the use of certain hazardous materials in electrical and electronic appliances, especially the concentration or usage of lead (Pb), cadmium (Cd), mercury (Hg), hexavalent chromium Cr(VI), polybrominated biphenylen (PBB) and polybrominated diphenylether (PBDE).

Our products delivered to you do not contain to the best of our knowledge any of the afore mentioned substances in any concentration or application prohibited by the regulations of the European directive 2002/95/EG (RoHS) dated 27.01.2003.

Furthermore our products do not contain chromated surface treatment containing Chrom(VI).

For our brass products the exception under point 6 of the appendix of the directive RoHs is applicable. Here is stated that „copper alloys with a lead percentage of up to 4.0 percent of weight...” are excluded from the requirements. The lead percentage in the semi-manufactured brass products that we use (CuZn39Pb2, CuZn39Pb3) is between 2.5 and 3.5 percent of weight and is thus constantly below the stipulated value.

(Status: 20.01.2006 /Revision: 002)

Best regards
JACOB GMBH
